Profile

Product designer with 6+ years of experience on AI, fintech, SaaS and marketplace products. I'm currently a Senior Product Designer at InstaDeep (a BioNTech company), where I design dashboards and decision tools for machine-learning products. Before that I was the first designer at Steer AI, where we launched three products, and the only designer at Konnect.

Most of my work has been in small teams, close to the developers. I usually take a feature from research through to design QA, I look after design systems, and I often prototype in code with Claude Code to check how something behaves before it gets built. I speak Arabic, English and French, and I'm used to presenting to founders and clients. I'd like to bring this to game and interactive products.

Experience

Senior Product Designer (UX/UI), InstaDeep (a BioNTech company) · Jan 2024 – Present · Tunis

- Design AI products including DeepPCB, a reinforcement-learning PCB router, and InstaNovo, a de novo peptide-sequencing model published in Nature Machine Intelligence.
- Design dashboards and decision tools that help technical and enterprise users make sense of model outputs, including what they see when results are missing, wrong or uncertain.
- Maintain and grow the design system used across InstaDeep's products and research demos, with documented components, tokens and states that engineers can build from directly.
- Designed the InstaNovo brand and its launch pages (landing, enterprise, pricing and onboarding), from a visitor's first look to sign-up.

- Prototype tricky interactions in code with Claude Code before handoff, then work with engineers on specs and design QA.

Product Designer Lead, Steer AI · Oct 2021 – Nov 2023 · Tunis

- First designer at an automotive-retail tech company. Led design across web and mobile and reported directly to the founders.
- Shipped three products from zero to launch: a B2B marketing site, a B2B SaaS platform and a two-sided marketplace.
- Built the design system and shared UX patterns used across all our products, which made new screens faster to deliver.
- Ran discovery with the CTO, engineering and marketing (interviews, journey maps, usability tests) and turned what we learned into roadmap priorities. Set up regular research, design critiques and handoff standards.

UX/UI Designer, Groupado · Feb 2021 – Sep 2021 · Tunis

- Designed the web and mobile app for a skills marketplace where anyone can teach what they know, from user flows to production-ready screens.
- Reworked the navigation and information architecture so people could finish core tasks more easily.

UX/UI Designer, Konnect · Feb 2020 – Jan 2021 · Tunis

- Only designer on the fintech products, including one of Tunisia's first digital wallets. Designed onboarding, KYC and payments for first-time users.
- Designed the UX/UI and brand identity for a Tunisie Telecom project.

Freelance Product Designer, T+ Ingénierie Informatique · Mar 2020 – Jan 2021 · Remote

- Designed web apps, admin dashboards and e-commerce sites for SME and enterprise clients, and ran the scoping and client workshops.

Skills

- **Product design:** end-to-end product design, interaction design, information architecture, responsive and mobile, accessibility (WCAG-aware)
- **Working with developers:** developer handoff and design QA, design systems (components, tokens, states), prototyping in code
- **Research and validation:** user interviews, usability testing, journey mapping, service design, A/B testing, analytics-informed iteration

- **Collaboration:** client workshops, stakeholder alignment, cross-functional facilitation, roadmap input, critique and mentoring
- **AI products:** visualising model outputs, data-dense dashboards, decision tools, error, empty and low-confidence states
- **Tools:** Figma, Framer, ProtoPie, Sketch, Claude Code, Google Analytics, VWO, Midjourney

Education

BTS Communication Visuelle, option Multimédia, Carthage Art Academy · 2017 – 2021 · Tunis
